

Recognizing Foreign Qualifications

what the numbers tell us

2011-2023

All Applicants with Foreign Qualifications

This means ...

44% applied to 22 regulated health professions

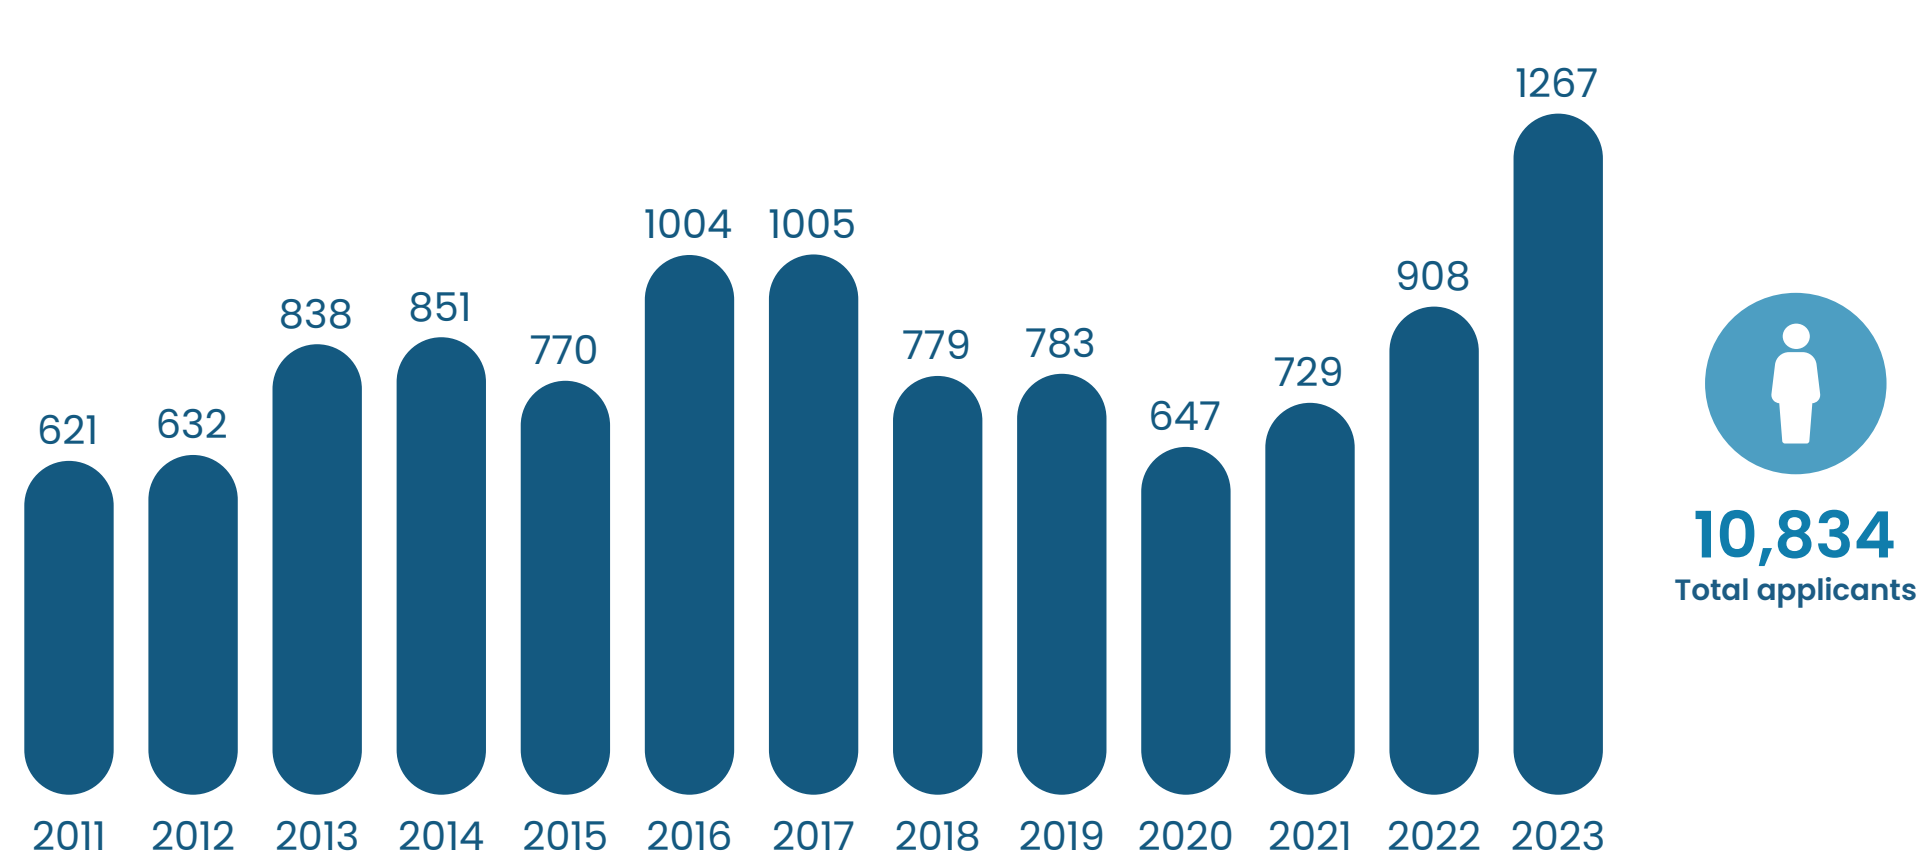

56% applied to 9 regulated technical, sciences, social & financial professions

833

average number of applicants per year

Applicants by Year

Top 10 Countries of Education - Applicants

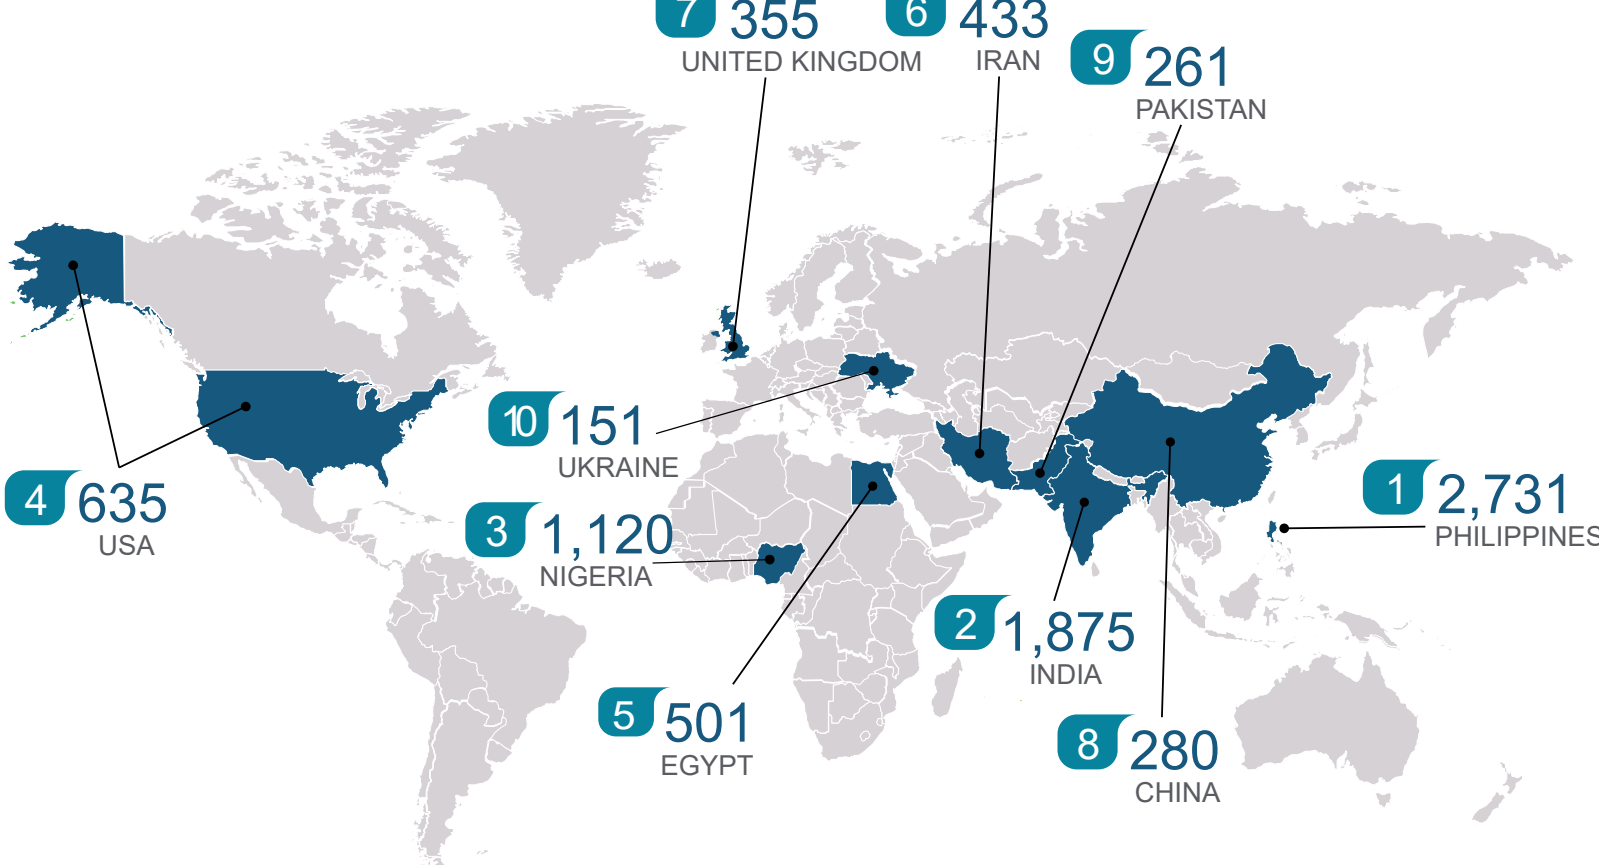

33%

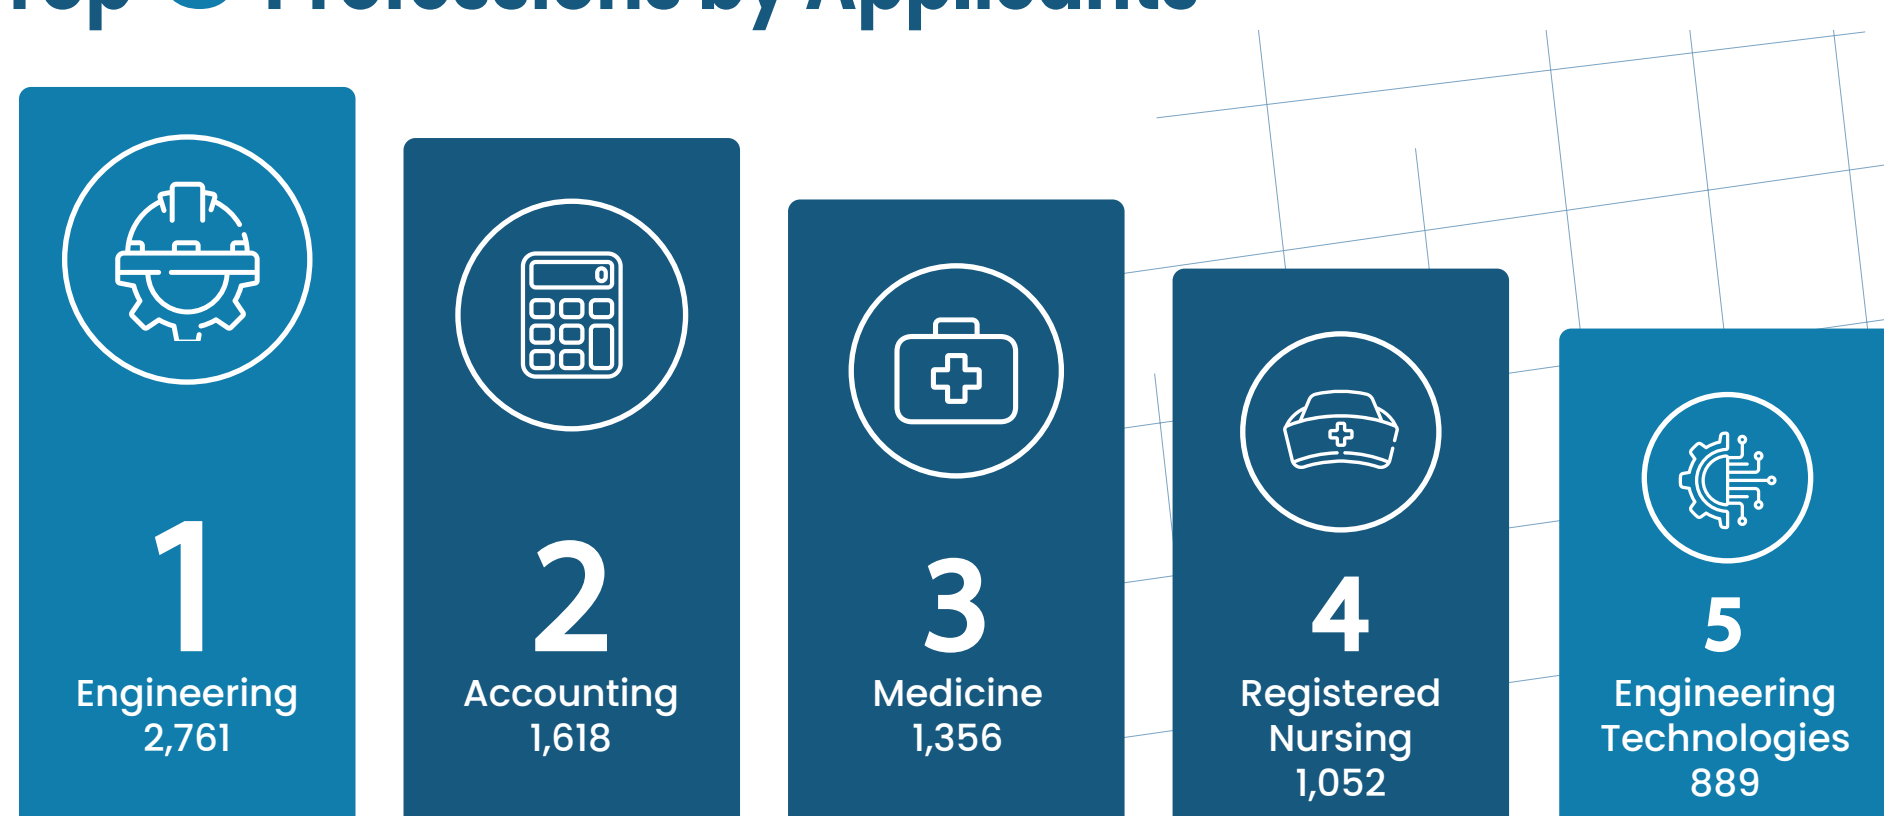

of these top 10 came from Philippines

77%

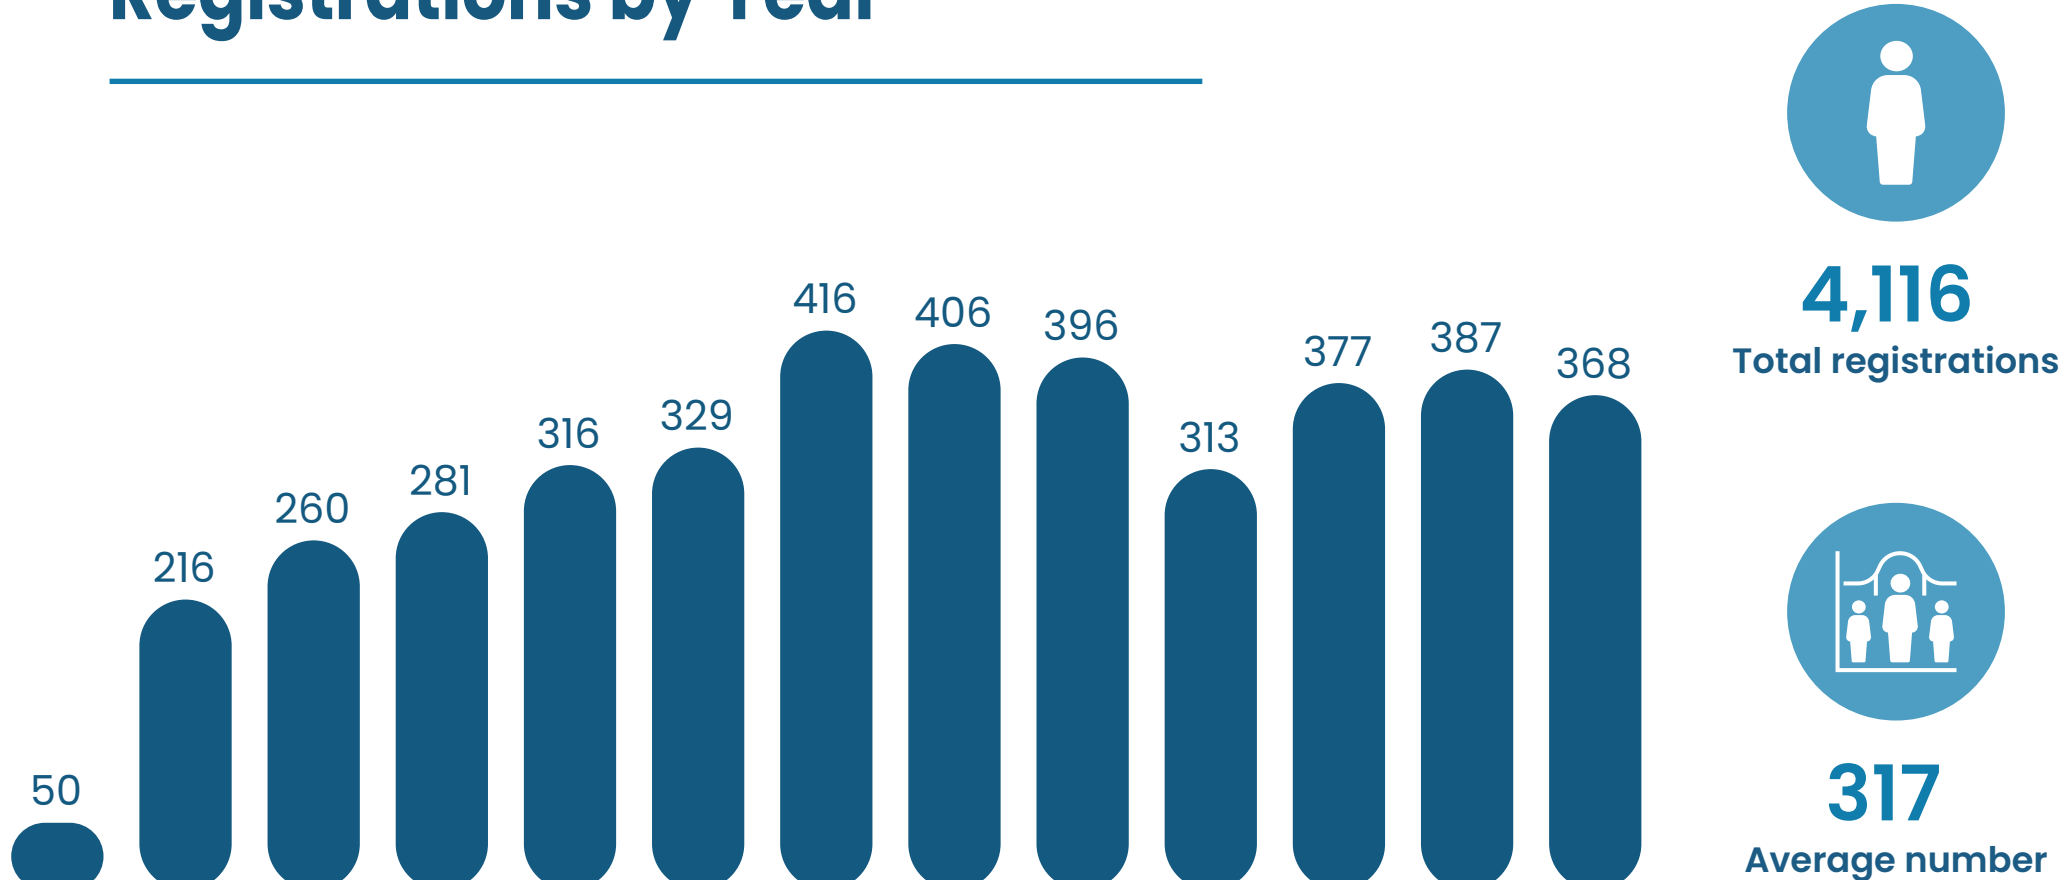

of all applicants came from these 10 countries

Top 5 Professions by Applicants

Registrations by Year

Top 5 Countries by Registrations

Average Timelines

1.6 years

average time to provisional registration

3 years

average time to registration

Notes:

This infographic presents registration data on internationally educated applicants to Manitoba regulated professions from 2011-2023. Each applicant is counted once, regardless of the number of applications made.

In more than half of Manitoba regulated professions, applicants apply first to a national third party for assessment. These individuals are not included in the Fair Registration Practices Office's dataset until they are successful with this part of the process and make the Fair Application to a Manitoba regulator. This means applicants are under-counted across the period.

Due to data collection methods, individuals who applied before 2011, but registered during this period, are not counted. As a result, registrations are under-counted at the beginning of this period.

Complete timeline information is unavailable for some applicants who registered. Timelines presented above are for 3,664/4,206 applicants who provisionally registered in the period and for 3,698/4,116 who registered in the period.
